Whom it may concern

We have been working with Amogh Machine Tools & Accessories, Bangalore since 2012 and their precision spindles have consistently met the demanding requirements of our CNC Machines used for Turning, Thread Milling and worm milling, spline cutting Application. Their unwavering commitment to quality, fast turnaround times, and transparent communication truly set them apart in the industry.

Amogh Machine Tools and Accessories is more than just a supplier — they are a trusted technical partner who understands the nuances of high-performance CNC applications. Their ability to provide custom spindle solutions, reliable after-sales support, and consistent product performance has helped us reduce downtime, increase machining accuracy, and eliminate our dependency on imported components.

We deeply value their engineering expertise and look forward to continuing this successful partnership for years to come.
